

Insights into Microbial Diversity and Disease Transmission among Wild Primates in Africa

REBECCA M. STUMPF

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN

Friday,
November 18, 2022
3:30 PM (Eastern Time)
Location: RAB-001
Douglass Campus

Biography: Prof. Rebecca Stumpf's research focuses on applying comparative biology in biodiverse, natural environments in Africa to shed light on patterns of ape behavior, and biology, host-microbial relationships, microbial transmission (including bacterial and viral), and antibiotic resistance from a One Health Perspective.

The interdisciplinary, collaborative research by the Stumpf Lab has direct implications for understanding human evolution and improving human health.
