3:30 PM (Eastern Time)
Location: RAB-001
Douglass Campus

Biography: Siobhán M. Mattison is an associate professor of evolutionary anthropology at the University of New Mexico and a rotator at the National Science Foundation. Her research focuses on explaining health and welfare in light of variation in human kinship and social structure norms. She conducts fieldwork with the Mosuo (Na) of Southwest China and among the Melanesian Ni-Vanuatu. She received her doctoral degree in bi-cultural anthropology from the University of Washington and trained as a postdoctoral fellow in anthropology and demography at Stanford University.
